

Seat Covers

- Slip-N-Grip two-layer construction ensures seat covers stay in place
- Standardized design protects bucket, bench and split seats
- Premium, Value and Heavy-duty options
- Custom imprinting and film available

The top (outside) layer of the seat cover is smooth so porters and technicians can "slip" in and out of vehicles easily. This allows them to work faster without the need for extra caution.

The bottom (inside) layer of the seat cover is formulated with a high friction plastic so that it can "grip" itself into place on cloth, leather and carpet. This layer keeps the product in place for continued protection.
